

RN Electronics joins the Kiwa Family

RN Electronics Ltd is pleased to announce that it has joined Kiwa Ltd, part of the international testing, inspection and certification (TIC) company Kiwa Group.

Kiwa UK operates within the fields of Global Market Access, EMC and Electrical, Construction, Fire Safety, Water, Energy and Agrifood, so RN Electronics fits smoothly into its global market access and EMC compliance business.

Present in many marketplaces, the common thread in the Kiwa range of services is integrity. Kiwa is known for its technical rigour, reliability and industry knowledge; RN Electronics' reputation, quality of service and market position are an excellent fit.

Paul Ray, Managing Director of RN Electronics, commented: "RN Electronics is an established EMC and Radio testing business, specialising in leading edge testing services. We are delighted to join forces with such a strong, trusted, and progressive international business with compatible values. It's a very exciting time for our business".

Paul Ray will continue to manage RN Electronics Ltd as part of the Kiwa Group. In his new Business Unit Manager role, he will work closely with other Kiwa businesses to expand the range of services offered to clients, including Global Market Access.

Kiwa UK's Chief Executive Paul Brown says the Kiwa UK Group has grown rapidly through organic growth and acquisition. "I am delighted to welcome the RN Electronics team to Kiwa," he continues. "RN Electronics' expertise complements our Kiwa service offering perfectly."

About RN Electronics

Established for over 30 years, we are specialists in advanced technology, EMC and Radio Testing with a UKAS accredited EMC and Radio testing facility. We provide product certification and support UKCA and CE marking across several markets, including communications, automotive, medical, defence, oil and gas, multimedia, consumer electronics and machinery.

About Kiwa:

A global top 25 Testing Inspection and Certification (TIC) organisation employing over 6000 staff in 35 countries. Our clients are from manufacturing and process industries, public and private utilities, governments and international institutions.

Kiwa's UK testing facilities are the product of several acquisitions, bringing together laboratories testing heating and cooking appliances, water and electrical products, and construction materials. Typical clients include manufacturers of boilers and stoves, showers and taps, civil engineers and local authorities involved in construction and highway projects. Our certification arm provides approval services for many of these and also for fire safety, food and agricultural products.

With expert knowledge in these areas, it's not surprising that we also have separate Consultancy services specialising in Energy (predominantly hydrogen and gas safety), in Construction, Fire Safety and in the Agrifood arena. Present in many marketplaces, the common thread in our range of services is integrity. We are known for our technical rigour, reliability and industry knowledge. Many of our laboratories are UKAS-accredited.
